

Street Light Controller

Enabling Smart Cities and Utilities through Intelligent Lighting Management Solutions

The Landis+Gyr Street Light Controller enables our customers to monitor and manage street lights — both High Pressure Sodium (HPS) and LED luminaires – on Landis+Gyr’s communication network. The Controller incorporates Landis+Gyr’s Network Node, a fully functional, small IoT RF radio module capable of communicating on Wi-SUN compliant RF Mesh or Mesh IP networks. As part of our Gridstream® Connect IoT portfolio, Landis+Gyr’s Street Light Controller and management software serve as a foundation for other smart city applications, while vastly improving energy and operational efficiencies.
